

The discovery of Supernova Energy
as most important daily energy source

approx. 1 Supernova explosion per second
approx. 86,400 Star explosions per day
approx. 31,5 Mio. Star explosions per year
in the currently observed universe.

Discoverer: Prof. Eddie Baron, USA
NATURE 395, 635/636; 663-674 (1998)

Quantum Physics Sensation Discovered:
Correlation of Quantum Physical Measurement
Data with the Cosmological Recordings on Supernova
Explosions? See: Einsteins Spuk, 2005, S. 135-139
by Prof. Anton Zeilinger, Vienna/Austria
approx. 100 Quantum Physical events in 100 seconds
with Photon source = approx. 1 event per second
Albert Einstein:
"God does not play dice" "spooky reaction"
